

The Global Standard for Wireless Connection

Capture data wirelessly with just a push of a button!

**MeasurLink** ENABLED  
Data Management Software by Mitutoyo

U-Wave Bluetooth is a modular transmitter that fits on the back of any Mitutoyo tool with Digimatic output for efficient data collection.

- > Connects to any Bluetooth enabled device
- > Goes into any software program that accepts keyboard entry
- > Free data collection apps available
- > Up to 90% more efficient than manual data collection\*

## Prevent defects and improve processes with MeasurLink®!

[measurlink.com](http://measurlink.com)

MeasurLink® is an easy-to-use data management and real-time SPC software. Monitor processes and send alerts to operators, engineers, and managers when adjustments need to be made.

- > Create measurement routines to guide operators through inspection
- > Set up alarms when processes trend out of control to limit defects
- > Use report templates to save time and share data with customers
- > Collect data with nearly ANY measurement device
- > Benefits manufacturing shops of any size
- > Return on investment in under one year\*

\*Results may vary

### Improved Efficiency

Monitor tool wear and cut scrap with easy-to-read charts and graphs in real-time

### Centralized data

Measurement data is stored and organized on a central SQL database for quick and easy access
